

## Audio Solutions Distributed Audio

### Distributed Audio

One of the more popular additions to the home cabling market is the introduction of distributed audio.

### What is Clipsal's Distributed Audio?

Clipsal's Distributed Audio is a system that enables the homeowner to distribute their radio, CD player, stereo or MP3 player to multiple rooms of their home.

Each room can be independently operated for On / Off and volume Up / Down for that room. You can even operate your stereo with the remote control from any room with the volume control wall plate.

Having a stereo in each room can be expensive. There are often space issues and safety precautions that need to be addressed around wet areas like bathrooms, pools and spas.

**Clipsal's Distributed Audio is a simple and so easy to use system, even a grown-up can use it.**

*It is easy and cost effective to install into every home.*

### IN-WALL SPEAKERS

**5600IWK,WE** Kevlar Drivers  
**5600IWP,WE** Polypropylene Drivers

### OUTDOOR SPEAKERS

**5600ODP,BK**

**5600ODP,WE**

Wall speakers are perfect for filling a room with sound; open plan, kitchen, living and dining areas.

Outdoor speakers are ideal for the BBQ and other outdoor entertainment areas.

Ceiling speakers are suitable for sound over a specific area such as a dining table, kitchen, bathroom or spa.

Connect your music source (CD or MP3 player, etc.) to the Stereo Input Module and listen to your music from up to 7 locations around your house.
