

Make your home
a smart home.

your guide
to affordable
smart living

a
me?

motorised garage doors, keyless entry
remote control TV's, DVD players and
ovens and dishwashers. Not a day goes
without new technology to make our lives easier.

How many times have you turned off
a light when you've left a light on, or pressed 'play' on
the TV when you've left it on and dim the lights? Or worse still...
forget to turn the iron off?

Now you can make your home a smart home,
room by room. You can add to it as you
go. The best news is it's very affordable!

Make your home and enjoy smart living!

Start with a wow factor for this cent

Start with a wow factor

Remember that a smart home is all about you. Ask yourself 'what are the things that my family and I want?'

If you are going to include a big screen TV, this is a great place to start.

You are going to want to make the most of your Hollywood-at-home experience by adding ambient lighting to see the look on your friends' faces as you sip and dim the lamp from the comfort of your sofa.

If you fit a C-Bus® Wireless light switch, a dimmer and lights by remote, you can also create a mood by turning on lamps and lights to a desired level.

You can even have an 'all off' mode that turns everything off with the push of one button - either on the remote or a wall switch.

Work at Living areas

Living areas are the heart of your home. This is true whether it's preparing meals, relaxing in the living room or entertaining friends.

Introducing a new level of convenience to your living areas with a range of lights, lamps and even appliances.

When you come home with an arm full of groceries, you'll be greeted by a 'Welcome Home' scene that turns on your lights with just one press.

Control from your car, so you'll never have to get out of the car.

Adjustable ambient lights to reduce glare, while a 'Dining' scene provides the perfect lighting to entertain.

Use a smart plug adaptor and get that fresh pot of coffee on the dining table.

Home for this cen

The number one feature

When we asked existing C-Bus® owners what they all said “The Goodnight button”.

Imagine, laying in bed and being able to turn off the lights in the house. But that’s not all, how great would it be to turn the bed lamp off if they’ve fallen asleep, without disturbing them?

Need to go to the bathroom at night? Turn on the lights, even get out of bed so you are not fumbling in the dark. You can even have a ‘Night’ scene that dims the lights so that you don’t disturb your loved ones.

Have an ‘All Off’ button at your bedroom, living room, bedroom, ensuite, walk in wardrobe lights, and turn off all lamps as you walk out.

Bring a whole new level of comfort to your home using C-Bus Wireless Wall Switches, Plug-in Switches, and Dimmers.

A home for your lifestyle

Steps to Home

You want C-Bus® Wireless
include
switches and colours
technician

technician to come back to see you after you
couple of months. You are bound to think
you would like added.

All Off

Press the 'All Off' button and turn off every light in the house as well as your bedside lamps. Turn on your ensuite light dimly from your bed if you need to get up in the night.

Welcome Home

Activate the 'Welcome Home' scene from your car or garage, and turn on hallway, kitchen and family room lights.

Night Lights

Create night lights that can turn children's lights off automatically after a preset time. If they call out at night, turn their light or lamp on dimly from your bedside remote.

Dining

Set the perfect scene for dinner parties with friends, or romantic dinners. One press and several lights and lamps will go to a preset level.

Appliances & Electrical

Turn coffee makers, fan heaters, spa pumps, water features, garden lights and other appliances on and off by

Change with your lifestyle

With C-Bus® Wireless, you can start with just one room and add to it piece by piece. Your electrician simply replaces your normal light switches with C-Bus Wireless light switches so your smart home can grow as your lifestyle changes.

Building an outdoor entertaining area? Add a C-Bus Wireless light switch to your patio light, plug adaptors for garden lights, spa pumps and water features and you can control the whole lot at the press of one button and even operate it by remote control. How good is that!

All of the switches and plug adaptors work in the same way as your garage door opener. You can push one button and have several lights turn on at various levels.

You can also set up a two-way system so you can turn any light on or off from anywhere in the house. For instance, you can turn on the kitchen light from the living room switch, as well as your family room light from the living room switch. And the best part is you can control it all with a remote control!
